

Free Safety & Facilities Training For Businesses

From the President of Paul Davis Restoration & Remodeling, Concept Industries and Paul Davis Emergency Services of Reading:

Staying abreast of technology, techniques and skill development is critical to the safety and productivity of every business. For this reason, I am proud to announce our high impact Training Division.

In past years, we have focused on education and skill development for our clients in the insurance industry. This has been so successful, we are now expanding to include industries outside the insurance realm. We increased our staff and added dozens of course offerings. Course agendas are standardized for quick implementation, yet we are also able to develop specific courses to meet the needs of businesses both in and out of the insurance industry.

*Stephen Rotay
President & CEO*

Consider your training, safety and development needs. Then review our many offerings. I'm confident we can assist you in reaching your goals. Classes are offered **free of charge** in our state-of-the-art training center at our Lancaster facility or we can discuss training at your facility.

Continuing Education Classes for Insurance Professionals

Our C.E. course offerings for 2010 will continue with at least 60 classes for insurance professionals. Each class is worth 3 PA insurance credits. Classes will be taught in several locations in various counties. Check out our upcoming classes at www.pdr-pa.com in our "Training & Resources" section.

Safety & Facilities Training

Course offerings are taught by our in-house instructor who has 30 years' experience in management of safety and loss control. Standard class offerings are listed below and are taught free of charge on-site at our new training facility, or we can teach on your site for a small fee. We also have the ability to customize training to meet your specific needs. More info on the "Training & Resources" section of www.pdr-pa.com or call Stephen Pakosh at (866) 765-0773.
